PROFILE

I am a passionate Full Stack Developer with around one year of hands-on experience in building responsive, user-friendly web applications. Proficient in the **MERN** stack (**MongoDB, Express.js, React.js, Node.js**), as well as **HTML, CSS, and JavaScript**. I have worked on diverse projects spanning both frontend and backend development to deliver scalable, robust, and engaging digital solutions.

I enjoy transforming ideas into fully functional applications, continuously learning and adapting to new technologies across the stack. I am eager to contribute my skills to collaborative teams and dynamic projects that drive innovation and enhance user experience.

SKILLS

- | | | | |
|-----------|--------------|--------------|---------------|
| - HTML | - CSS | - Javascript | - TailwindCSS |
| - MongoDB | - Express.js | - React.js | - Node.js |
| - Git | - Gitlab | - Next.js | - Webflow |

PROFESSIONAL EXPERIENCE

White Orange Software

12/2024 – present | Surat, India

Frontend Developer Intern

Designed and developed responsive web interfaces using **HTML, CSS, JavaScript, and React.js**. Built custom email templates with **MJML** and developed client-specific websites in **Webflow**. Collaborated with teams to deliver multiple live projects with a focus on client requirements and user-centric design.

Zidio Development

07/2024 – 08/2024

FullStack Developer Intern

Developed full-stack web applications using the MERN stack, contributing to both frontend and backend development. Built **RESTful APIs**, managed **MongoDB** databases, implemented **user authentication**, and created responsive interfaces. Delivered a Car Rental Web Application with user booking features and an owner dashboard for managing rentals and availability.

PROJECTS

Job Portal App

This Job Portal App is a full-stack web application developed using the MERN stack, a popular JavaScript-based framework that provides end-to-end capabilities for creating web applications. Shadcn UI is leveraged for the front-end components, delivering a clean, responsive, and accessible design that aligns with modern UI standards.

Book Store App

A full fledged MERN stack project which uses the concepts of MongoDB, Express.JS, React.JS & Node.JS. It uses tailwind CSS for styling. It's has both the client side and the admin dashboard to add, delete or edit the books. In the client side we can add different books to cart and checkout.

EDUCATION

B.E. in Computer Engineering

2021 – 2025 | Surat, India

C. K. Pithawala College Of Engineering and Technology
